Ginny and Sue,  
Debbie Mayo gave me your names for a question we have.

Attached please find reports on a P-Xylene Spill that occurred several years ago at the State Ports on River Road. What is the status of the project? Feel free to give me a call to discuss.

Thank you,

Kent Harrell, PE

Dear Kent:

I have attached copies of the Groundwater Monitoring Report for the Paraxylene plume that is under the NC Ports property adjacent to River Road.

On the basis of this report, the soil in this area is not contaminated, but the groundwater is contaminated. If your contractor has to remove any groundwater from the excavated areas of the directional bore, you will need to address this in your project specifications. I have attached a copy of specifications for "Monitoring for Hazardous Materials" for your use.

If you have any questions about the report, please contact Mr. Todd Walton in our office. Todd is the Environmental Supervisor for the Ports. Todd's phone number is 251-5678.

Feel free to contact me if you have any questions.

Sincerely,

John R. Lenfestey, P.E.
